

**WHAT IS CLAIMED IS:**

1. A spread mat obtained by spraying and bonding crushed particulate material of from 15 to 80 meshes at a distribution rate of from 50 to 150 g/m<sup>2</sup> through an adhesive agent onto the front surface of a spread mat formed by stacking a large number of synthetic resin filaments in loop, wherein the adhesive agent is prepared by mixing a polyvinyl chloride-based paste resin, a polyester-based plasticizer, a stabilizer and a diluent.
- 5
- 10 2. The spread mat as defined in Claim 1, wherein the crushed particulate material is formed by crushing a hard synthetic resin material.
